

PLC for broadband communications which is being reviewed is in my opinion going to be the greatest horror story of all time for users of HF communications from the HAM operators, AM radio stations etc. An absolute NO to this type of communications must be voted by the FCC. This is another way to enhance the bank accounts of the rich at the expense of the "little guy" in the USA. My way of life as a HAM and SWL would be denied to me and a violation of my rights to receive communications in the most or all of the HF band. Thank you, Please vote NO.
